HTML-SLIDES EXAMPLE · COMMUNITY GARDEN

A shared rota makes community gardening easier

A simple season plan — discussion draft

All names, activities and figures in this presentation are **fictional and illustrative**. No client or organisation is represented.

FICTIONAL EXAMPLE

TOPIC	DATE	VERSION	PAGES
Shared garden	2026-10-14	Example	9

Three small changes reduce weekly coordination time from 30 to 24 hours

A clear rota, shared tools and a simple task board make routine work easier.

- Group tasks by day so volunteers know what to expect.
- Keep frequently used tools in a labelled shared area.
- Review the rota together after the first month.

6 hours

illustrative weekly time saved

> Next step: agree on a four-week trial rota.

01

PART 1

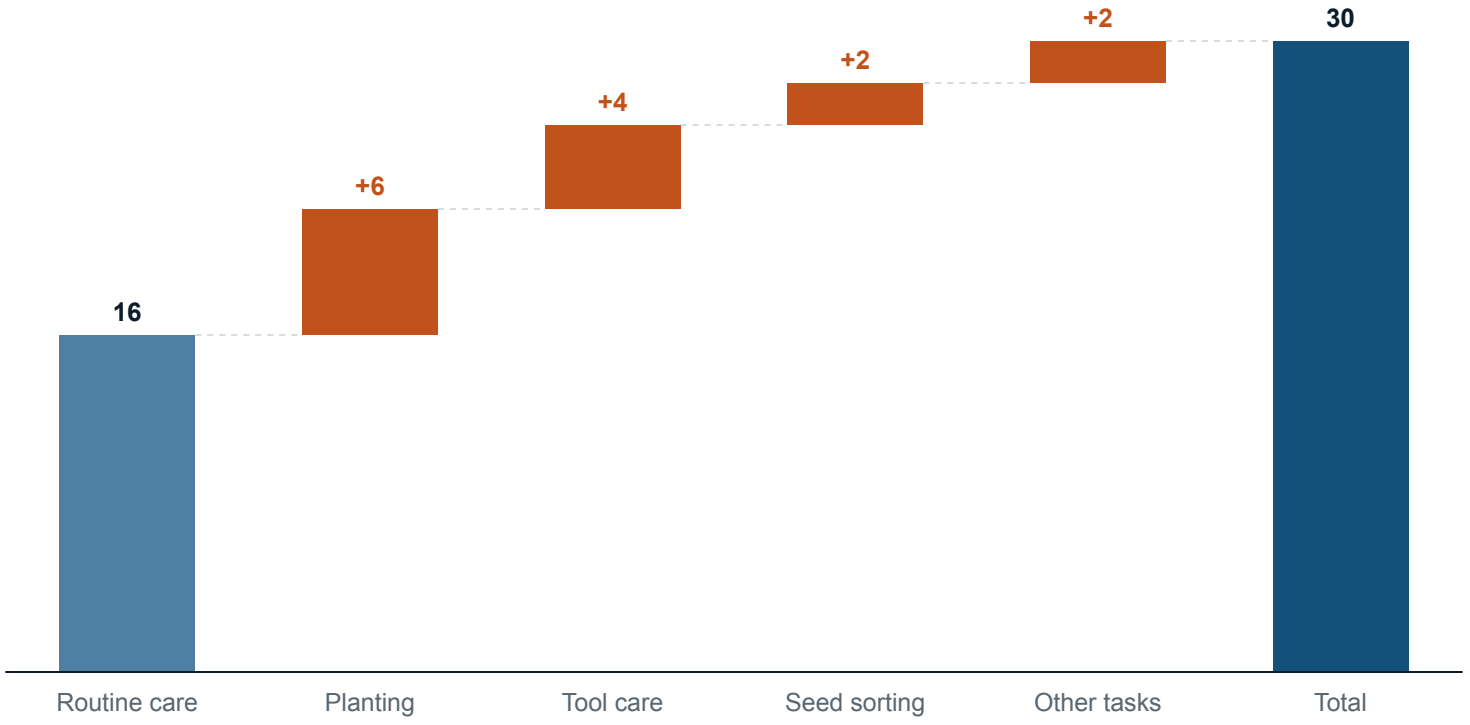

Weekly activities

A simple view of routine tasks and volunteer time

Routine care and planting account for 22 of the 30 weekly volunteer hours

How weekly tasks add up

volunteer hours per week

> Start by making the two largest task groups easier to coordinate.

Routine care includes watering, weeding and checking beds.

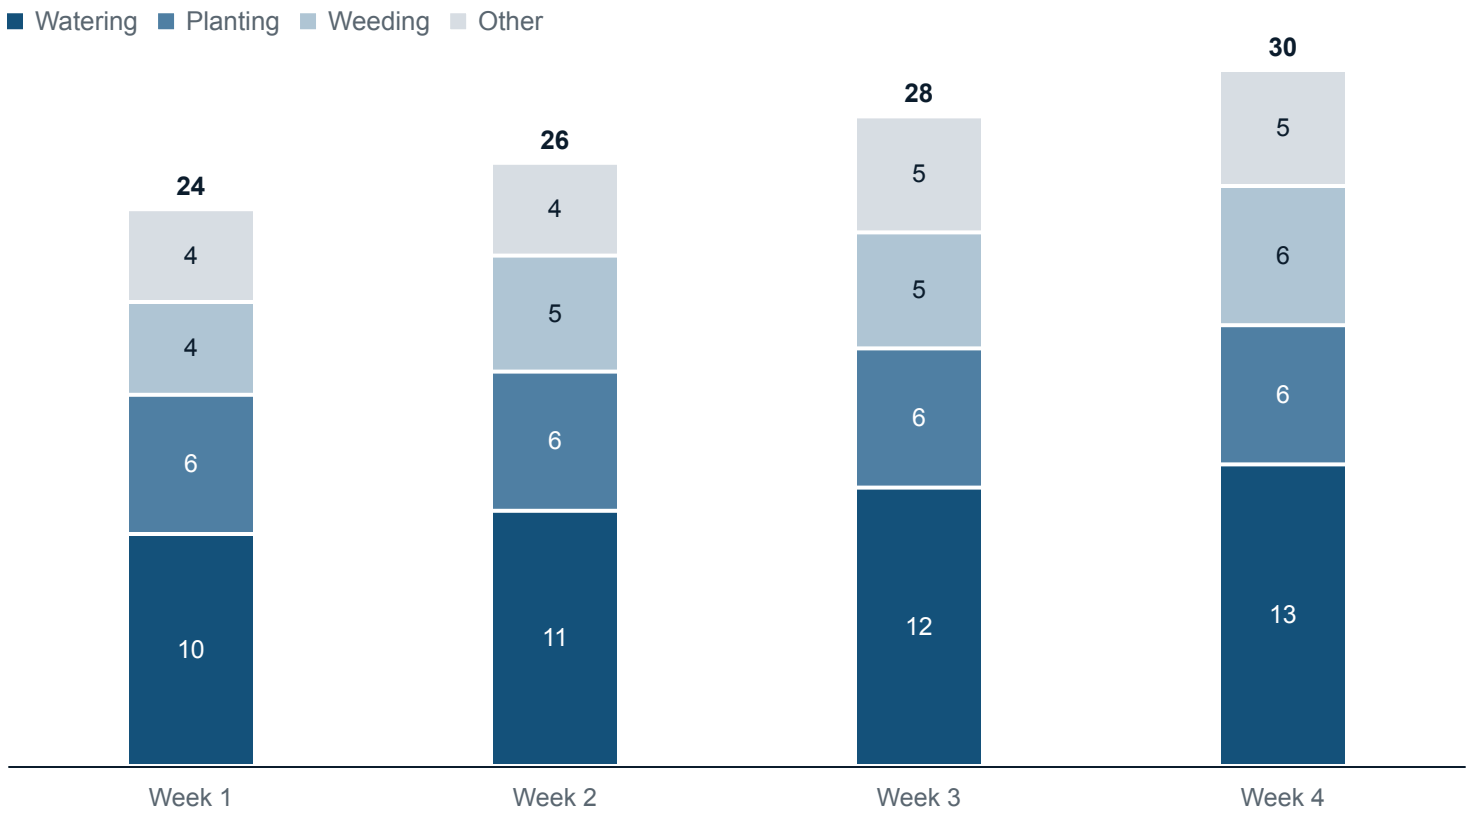

Planting sessions are scheduled in advance.

Source: fictional example data, not a real project

Watering remains the largest task as the shared garden grows

Weekly time by activity

volunteer hours

Regular watering benefits from a predictable rota.

A shared task board helps volunteers see what has already been done.

Review the schedule weekly rather than adding more meetings.

Source: fictional example data, not a real project

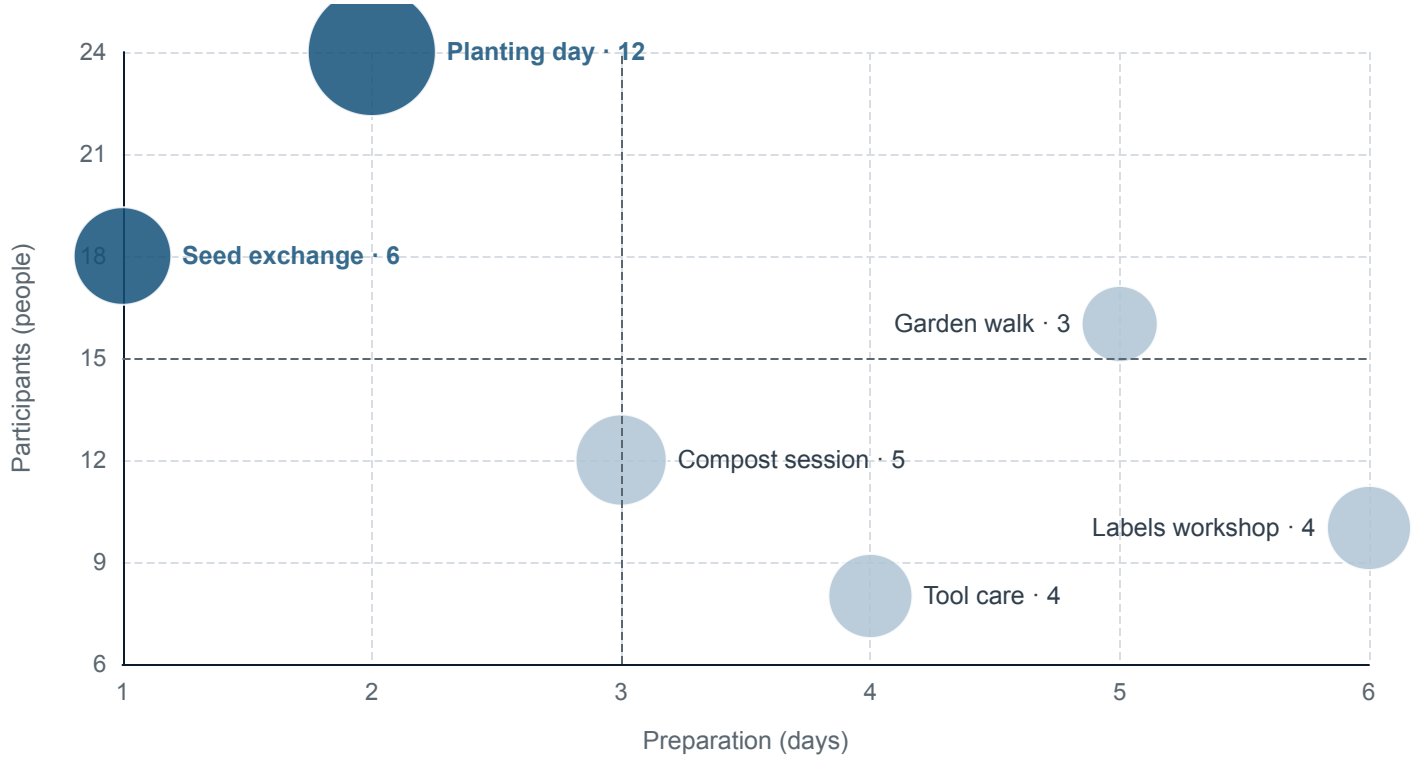

Planting day and the seed exchange are simple group activities

2 of 6

activities combine short preparation with at least 15 participants.

Activities: preparation, participants and volunteer time

Bubble size: volunteer hours

Source: fictional example data, not a real project

The season has three simple phases, with a review after each

Phase 1 · Prepare

Check tools, sort seeds and prepare the beds together.

February–March

→

Phase 2 · Plant

Plant seedlings and agree on a shared watering rota.

April–May

→

Phase 3 · Care and share

Maintain the beds, welcome visitors and share the harvest.

June–September

After each phase, ask what worked and adjust the next activities together.

A shared rota frees six hours each week for other garden activities

TASK GROUP	BEFORE (HOURS)	AFTER (HOURS)	SAVED (HOURS)
Routine care	16	13	3
Planting	6	5	1
Tool care	4	3	1
Other tasks	4	3	1
Total	**30**	**24**	**6**

These figures demonstrate the format. A real garden would record its own tasks and available time.

Source: fictional example data, not a real project

Keep the plan simple and review it together
